

Customers

With just 10 minutes of maintenance a week, customer after customer has found MailFrontier's self-running, self-updating email security solution the easiest to manage.

Awards

MailFrontier has won numerous awards, including the following:

MailFrontier Gateway Server, Small Business Edition

MailFrontier Gateway™ Server, Small Business Edition offers the total inbound email protection that every company needs and the easy administration that a smaller company wants. Designed for up to 50 users, Small Business Edition offers growing businesses complete enterprise-class email protection with the best protection, effortless control, and high performance.

Best Protection

MailFrontier protects networks from email threats using MailFrontier Cognite™, an end-to-end email attack-monitoring system that identifies and stops email attacks. MailFrontier Cognite tracks the reputation of the email servers, evaluates message content, analyzes the impact on recipients, and checks any embedded URLs. Through MailFrontier Cognite, Small Business Edition covers all inbound email security needs.

- Anti-Spam
- Anti-Virus
- DHA and DoS Protection
- Time Zero Virus Protection
- Anti-Phishing
- Policy Management

Effortless Control

Small Business Edition is designed to ensure simple configuration, easy customization, and automated maintenance, all through an easy-to-use, Web-based administrative interface.

- **Quick Configuration** in less than an hour, protecting your network as soon as it is installed
- **Auto-Update** of all data and software, reducing the administrative maintenance
- **LDAP Integration**, enabling easy group and user-level flexibility while IT retains complete control
- **Streamlined Group and End-User Management**, creating specific rules for the organization, group, or mailbox with just a few clicks or delegating administrative privileges to groups or end users with ease
- **Personalized End-User Controls** at IT discretion with corporate limits, enabling users to access their junk box without burdening IT administrators
- **Detailed Reporting**, providing easily customizable, system-wide and granular reporting, including information on attack types, solution effectiveness, and system performance

MailFrontier Gateway requires just minutes of administration each week, providing unparalleled ease in implementation and management.

High Performance

MailFrontier provides high performance through its unique MailFrontier Preemptive Scanning MTA™ that offers breakthrough message analysis and industry leading message delivery rates.

Protection for Growing Enterprises

MailFrontier recognizes the unique needs of the small business and has created the Small Business Edition with administrative features to assist these organizations every day.

Regardless of your size or stage of growth, MailFrontier incorporates its patent-pending security technology into every product we offer so that every company experiences a leading, all-in-one email security solution.

Anti-Virus Partners

Kaspersky is a technology leader and acknowledged expert in the development of anti-virus signature technology. In tests conducted on 24 leading anti-virus vendors, Kaspersky was the fastest to create and deploy signatures.¹

Key Protection Features of MailFrontier Gateway Server, Small Business Edition

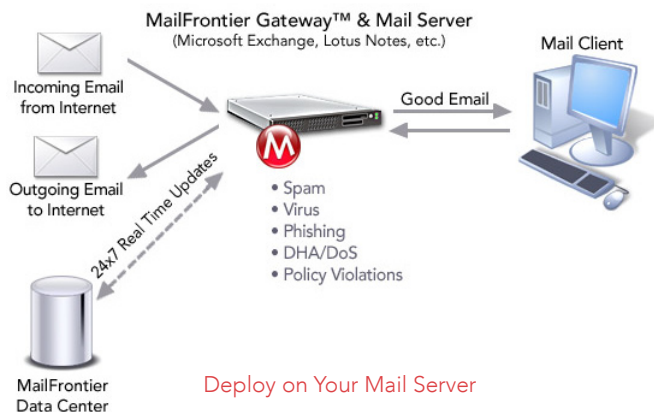

- **Anti-Spam** stops 98 percent of spam with essentially no false positives.
- **MailFrontier Time Zero Virus Technology™** guards the network prior to the availability of virus signatures with predictive methods and responsive techniques.
- **Virus Signatures** protect from known viruses with the leading anti-virus engine from Kaspersky Labs.
- **Anti-Phishing** evaluates the indicators unique to phishing emails and labels phishing as Fraud in the inbox.
- **DHA/DoS Attack Safeguards** protect the network from deluges of email.
- **Policy Management** enables inbound email policies at a company, business unit, functional, geographic, group, and/or user level.

Deployment Options

With Small Business Edition, effective email security has never been easier. You can choose a deployment that best fits your environment and your budget. Small Business Edition can be deployed on its own gateway server or on your existing mail server.

Deploy as a Stand-Alone Gateway

Deploy on Your Mail Server

MailFrontier combines complete protection with effortless control and high performance to ensure that businesses get a "no compromise" solution that can easily and effectively secure their networks.
